Approach

SAHAJ HOSPITAL · INDORE

Best Hyperbaric Oxygen Therapy Centre in Indore

Advanced oxygen healing technology for faster recovery and better health — delivered with compassion and clinical expertise.

What Is Hyperbaric Oxygen Therapy?

Hyperbaric Oxygen Therapy (HBOT) is a specialized, non-surgical treatment where patients breathe 100% pure oxygen inside a pressurized chamber. The increased pressure allows oxygen to dissolve more effectively into blood plasma and tissues — helping the body heal naturally.

Enhanced Oxygen

Delivery

Oxygen reaches tissues with poor blood supply

Improved Tissue

Healing

Accelerates natural repair at the cellular level

Infection Control

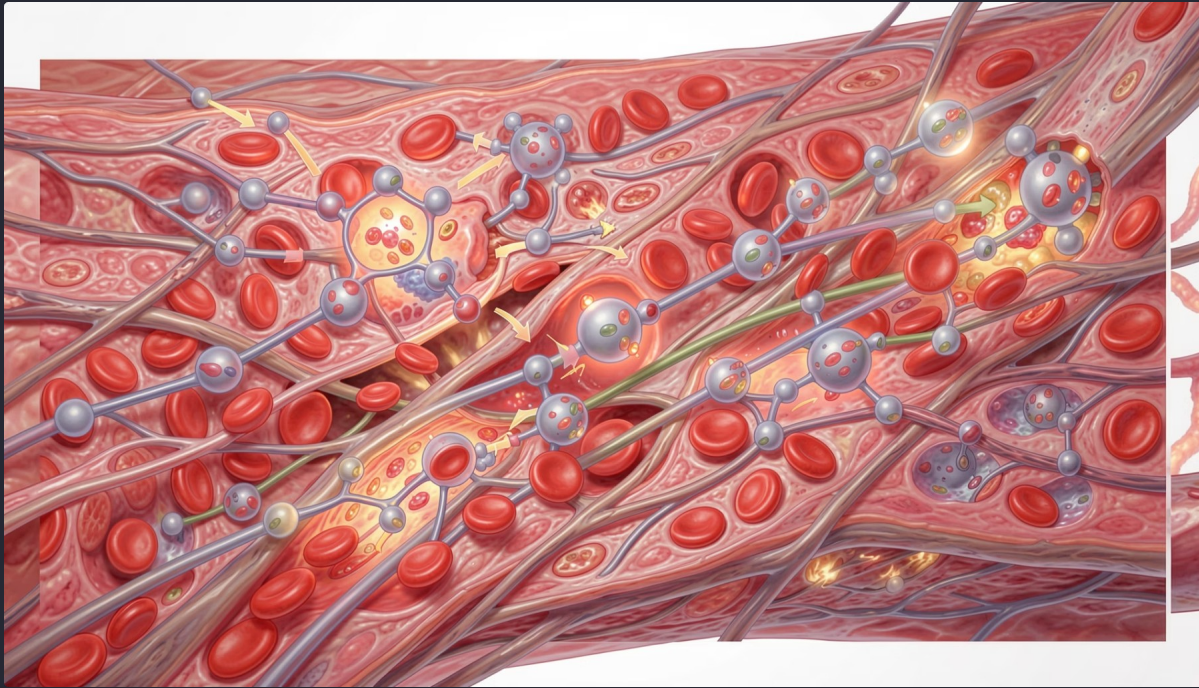

Supports the body's immune response

Non-Surgical

Therapy

Safe, comfortable, and drug-free

The Science Behind Oxygen Healing

How HBOT Works

During treatment, atmospheric pressure inside the chamber is increased while the patient breathes 100% oxygen. This process allows oxygen to reach damaged tissues that may not receive adequate blood supply under normal conditions.

- Increases oxygen saturation in blood plasma
- Stimulates new blood vessel formation

- Supports cell regeneration and repair
- Enhances immune function and accelerates healing

Conditions That May Benefit from HBOT

HBOT is used as part of comprehensive treatment plans for conditions requiring enhanced tissue oxygenation and accelerated healing.

Diabetic Foot Ulcers

Promotes healing in chronic, non-healing wounds

Burns & Trauma Recovery

Supports tissue repair and reduces infection risk

Radiation Tissue Injury

Helps restore damaged tissue after radiation therapy

Post-Surgical Healing

Accelerates recovery and supports graft survival

Why Patients Choose HBOT

HBOT supports the body's natural healing mechanisms by improving oxygen availability at the cellular level — leading to measurable improvements in recovery and quality of life.

Faster Wound
Healing

Better Blood
Circulation

Infection
Management

Increased Cellular
Energy

Reduced Swelling

Improved Overall
Healing

Is HBOT Right for You?

Suitable Candidates

Diabetic foot patients

Chronic wound patients

Post-surgical recovery cases

Burn injury patients

Radiation injury patients

Individuals requiring advanced healing support

 A medical evaluation by qualified healthcare professionals is required to determine treatment suitability. Every patient's journey is personalized.

Your HBOT Treatment Journey

From first consultation to completed therapy, our team guides you through every step with care and clarity.

01

Medical Consultation & Evaluation

Comprehensive assessment of your condition and treatment goals

04

Breathing 100%

Oxygen

Relax while the chamber delivers therapeutic oxygen at pressure

02

Personalized Treatment Planning

Customized session plan designed for your specific needs

03

Entering the Hyperbaric Chamber

Comfortable, monitored environment with trained staff present

05

Monitoring & Session

Completion

Continuous monitoring ensures safety; sessions typically last 45–120 minutes

Expected Results

Healing Through Enhanced Oxygenation

Results vary depending on the condition being treated and individual patient factors. Many patients undergo multiple sessions as part of a comprehensive treatment plan designed by their medical team.

■ Better wound healing and tissue health

■ Reduced inflammation and improved blood supply

■ Faster recovery and improved quality of life

Why Choose Sahaj Hospital?

Sahaj Hospital is recognized for offering advanced Hyperbaric Oxygen Therapy with dedicated infrastructure, specialized medical support, and a patient-centered approach to healing.

Dedicated HBOT Facility

Advanced hyperbaric chamber with comprehensive patient monitoring

Experienced Medical Team

Skilled professionals delivering personalized treatment plans

Multispeciality Support

Modern infrastructure with integrated specialist care

Patient-Centered Care

Compassionate support throughout your entire healing journey

Book Your Consultation Today

Discover how advanced oxygen therapy may support your healing, recovery, and overall wellness — under expert medical supervision at Sahaj Hospital, Indore.
